## SUMMARY

Junior Software Engineer looking to specialize in full-stack web development. I have a solid foundation in Java, Spring, .NET, TypeScript/JavaScript, React, PostgreSQL, and REST APIs.

## EDUCATION

### Karel de Grote Hogeschool

Antwerpen, Groenplaats

Bachelor's degree Applied Computer Science

Sep 2021 - Sep 2025

- Learned the fundamentals of programming in several languages, for example Java, Python, C#, C, and JavaScript. I also learned to work in a team and acquired the practical skills to function as a professional software engineer by using tools like GitLab for issue tracking and communication.

### Vrij Technisch Instituut Kontich

Kontich

Electrical Installation Techniques

Sep 2015 - Jun 2021

- Learned the basics of electricity and industrial installation techniques, including driving motors, programming PLCs, and measurement and control.

### SoloLearn

Remote

CSS and HTML Certificate

Mar 2018 and Apr 2017

- I earned this certificate by working on it every morning and evening on the bus and studying on my way home from school, because I was very interested in building my own website. During that time I developed a strong interest in programming and everything related to computer science.

## EXPERIENCE

### InfoSupport

Mechelen

Internship

Apr 2025 - Jun 2025

- Built a project called Info Quest to encourage compliments between colleagues. In this project we used Kotlin Multiplatform and Kotlin with Spring Boot on the backend. Together with my teammate, I learned to communicate in a professional environment.

### Skillz

Antwerp

Monitor

Seasonal: Jul 2023 - Aug 2025

- Taught children the basics of programming using software and kits such as Scratch, LEGO SPIKE, and micro:bit. This experience demonstrated the value of clear communication and explaining concepts as simply as possible.

## PROJECTS

### Lull App

- A local-first productivity app designed to be simpler than Notion. This passion project uses SvelteKit, Tauri, SQLite, and Drizzle, implemented in a local-first way.

## SKILLS

**Languages & Frameworks:** TypeScript, JavaScript, React, C#, .NET, Java, Spring, Python, Spark, PostgreSQL

**DevOps & Tools:** Git, Docker, CI/CD, VS Code

**Spoken languages:** Dutch, English, French

**Soft skills:** Creativity, open-mindedness, empathy, teamwork, adaptability, self-reflection

**Interests:** Media production, fast websites, user experience, new technologies

**Productivity tools:** Obsidian, Zen Browser, GIMP, Excalidraw, Figma
